Washington, D.C. 20554**

**August 3, 2011**

**Re: Docket # 11-65**

**Members of the Commission:**

**I have written this letter to urge you to approve the proposed merger between AT&T and T-Mobile USA.**

**This merger will bring important economic benefits to communities like Lawrence, Kansas. If approved, the merger will bring access to high-speed mobile broadband technology, something that will greatly help our small businesses.**

**In fact, should you approve this merger, AT&T will expand access to over 97 percent of America, and much of that expansion will take place in smaller cities like Lawrence, and rural areas of the country. Access to high-speed mobile broadband technology would be transformative for small businesses, providing the tools and infrastructure that will allow them to attract new business and to compete nationally and globally.**

**Small businesses in America are where the jobs are created, and in our current economic situation, we should be doing everything in our power to help small businesses create jobs and get our economy moving again. This merger would make use of private investment to achieve a major public policy goal – near universal access to high-speed broadband – and would help jump start innovation and economic investment along the way.**

**This merger would be good for my employer, it would be good for smaller cities like Lawrence, Kansas, and most importantly, it would be good for America. I hope you will approve this merger.**

**Sincerely,**

  
**Richard Stuntz, General Manager  
Alvamar Country Club, Lawrence, Kansas**

**CC:**

**Chairman Julius Genachowski  
Commissioner Michael Copps  
Commissioner Robert McDowell  
Commissioner Mignon Clyburn**
